Chapter 1

Fresh Installation Requirements

Security Server Requirements

Operating System

Note

- All 64-bit versions of the listed operating systems are supported unless noted otherwise.
- The Security Server does not support Windows server operating systems that run the **Server Core** environment.

TABLE 1-1. Minimum Operating System Requirements

SERIES OR FAMILY	SERVICE PACK OR RELEASE
Windows 10	May 2019 Update (and earlier)
Windows Home Server	Power Pack 3
Windows Server 2008	SP2
Windows Server 2008 R2	SP1
Windows SBS 2008	SP2
Windows Essential Business Server (EBS) 2008	SP2
Windows SBS 2011	SP1 (included out-of-the-box)
Windows Home Server 2011	SP1
Windows Server 2012	N/A
Windows Server 2012 R2	Update
Windows Server 2016	N/A
Windows Server 2019	N/A

Web Server

Setup checks if a web server exists on the target computer.

TABLE 1-2. Web Server Detection Scenarios

SCENARIO	RESULT	Notes
Setup detects both IIS and Apache web servers	 For a typical or minimal installation, Setup automatically uses IIS. For a custom installation: 	If the endpoint runs Windows 10, Trend Micro recommends a custom installation and choosing Apache as the web server.
	 Setup automatically uses IIS if the Apache web server version is not supported (only version 2.4 is supported) 	
	 You can choose either of the two web servers if the Apache web server version is supported. 	
Setup detects only an IIS web server	For a typical or minimal installation, Setup automatically uses IIS.	
	For a custom installation, you can choose either of the two web servers. If you choose Apache, Setup automatically installs Apache version 2.4.	

SCENARIO	RESULT	Notes
Setup detects only an Apache web server	 Setup uses Apache if the Apache version is 2.4. Installation cannot proceed if other Apache versions exist. Consider the following actions: Uninstall Apache if no application is using it. Upgrade Apache to version 2.4 if any of these versions is compatible with the applications that use Apache. 	The following platforms have IIS and are supported by the Security Server: • Windows Server 2008 or 2008 R2 • Windows SBS 2008 • Windows EBS 2008 • Windows SBS 2011 Standard or Essentials • Windows Server 2012 and 2012
Setup detects neither web server	Choose another endpoint on which to install the Security Server. Setup automatically installs Apache web server 2.4.	R2 • Windows Server 2016 • Windows Server 2019 If Setup cannot detect IIS on these platforms, IIS may have been disabled (by default or by the system administrator). Enable IIS if this is your preferred web server.

Hardware

TABLE 1-3. Minimum Hardware Requirements

HARDWARE	SCAN METHOD	SPECIFICATIONS
Processor	Conventional scan	Intel™ Pentium™ 4 or higher
	Smart scan	Multiple processors or multi-core processor
Memory	Conventional scan (32-bit)	• 512MB
exclusively for		• 1GB recommended
the Security Server	Smart scan (32-bit)	• 1GB
		2GB recommended

	SCAN METHOD	SPECIFICATIONS
	Smart or conventional scan 64-bit)	• 1GB • 2GB recommended
Available disk space N	I/A	 4.1GB for the Security Server program files 6.9GB for Security Server operations Note 11GB is exclusively for the Security Server. Additional disk space is necessary because the Security Agent will also be installed on the same computer as the Security Server (installing the Messaging Security Agent is optional). See the next sections for the disk space requirements for agents.

Virtualization

Worry-Free Business Security supports the following virtualization applications:

- Citrix Presentation Server[™] 4.0, 4.5, 5.0 (XenApp)
- XenServer 6.0, 6.1, 6.2
- XenClient 2.0, 2.1
- VMwareTM ESXTM 3.x, 4.x, 5.0, 5.1, 5.5, 6.0, 6.5
- VMware Server 1.0.3, 2.0.1
- $\bullet \ \ VMware \ Workstation \ 6.0, \ 6.5, \ 7.0, \ 8.0, \ 9.0, \ 10.0, \ 11.0, \ 12.0, \ 13.0, \ 14.0$
- Microsoft Hyper-V[™] Server 2008 R2

- Microsoft Hyper-VTM Server 2012 and 2012 R2 and Windows Server 2012 and 2012 R2 Hyper-VTM
- · Remote Desktop

Web Console Requirements

TABLE 1-4. Minimum Web Console Requirements

REQUIREMENT	MINIMUM SPECIFICATIONS
Browser	Microsoft™ Internet Explorer™ 9.0, 10.0, 11.0 (32 and 64 bit)
	• Mozilla™ Firefox™ 54 (ESR), 55, 56, 57
	• Google Chrome™
	• Microsoft Edge™
PDF reader	Adobe™ Acrobat™ Reader 6.0. Newer versions highly recommended.
Display	High-color display with a resolution of 1366 x 768 pixels or higher

Security Agent and Update Agent Requirements

Operating System

Note

All 64-bit versions of the listed operating systems are supported unless noted otherwise.

TABLE 1-5. Minimum Operating System Requirements

SERIES OR FAMILY	SERVICE PACK OR RELEASE	
Windows 10	May 2019 Update (and earlier)	
Windows SBS 2011	SP1 (included out-of-the-box)	

SERIES OR FAMILY	SERVICE PACK OR RELEASE
Windows Home Server 2011	SP1
Windows Server 2012	N/A
Windows Server 2012 R2	Update
Windows Server 2016	N/A
Windows Server 2019	N/A

Processor

TABLE 1-6. Minimum Processor Requirements

Processor	OPERATING SYSTEM	CLOCK SPEED
 Intel[™] Pentium[™] x86 or compatible processor x64 processor supporting AMD64 and Intel EM64T technologies 	Windows 10, Home Server 2011, SBS 2011, SBS 2011 Essentials, Server 2012/2012 R2, Server 2012/2012 R2 Essentials, Server 2016, Server 2016 Essentials, Server 2019	1.4 GHz

Memory

TABLE 1-7. Minimum Memory Requirements

OPERATING SYSTEM	MEMORY EXCLUSIVELY FOR THE SECURITY AGENT
Windows Server 2016, 2019	• 2GB
	16GB recommended
Windows SBS 2011 Standard/Essentials	• 8GB
	• 10GB recommended
Windows 10	• 1GB
	2GB recommended
Windows Home Server 2011, Server 2012/2012 R2,	• 2GB
2012/2012 R2 Essentials	8GB recommended

Disk Space

- 1.5 GB
- 2 GB recommended

Note

Allocate an additional 100MB of disk space when enabling the auto backup feature of **Ransomware Protection**.

For more information, see the Administrator's Guide.

Network Traffic During Agent Deployment

The following table lists the **minimum** network traffic created when the Security Server deploys the agent installation package to a computer through Internal Web Page, Login Script (Autopcc), or Remote Install:

Agent installation package deployed to a 32-bit computer	200 MB for Security Agent operations
Agent installation package deployed to a 64-bit computer	300 MB

Virtualization

Agents support the same virtualization applications supported by the Security Server. See *Virtualization on page 1-5*.

Others

- 256-color display or higher with resolutions of 800x600 pixels or higher
- Gigabit network interface cards (NICs) supported

Messaging Security Agent Requirements

Operating System

Note

All major editions and 64-bit versions of the listed operating systems are supported unless noted otherwise.

Setup automatically installs the following components if the Messaging Security Agent (MSA) and the Security Server are installed on the same endpoint. Otherwise manually install the following components on the endpoint where the Messaging Security Agent is installed:

- .NET Framework 4.0
- · .NET Framework 3.5 SP1
- · Windows Installer 4.5

TABLE 1-8. Minimum Operating System Requirements

SERIES OR FAMILY	SERVICE PACK OR RELEASE	
Windows Server 2008	SP2	
Windows Server 2008 R2	SP1	
Windows SBS 2008	SP2	
Windows EBS 2008	SP2	
Windows SBS 2011	SP1	
Windows 2012	SP1	
Windows 2012 R2	SP2	
Windows Server 2016	N/A	

Web Server

TABLE 1-9. Minimum Web Server Requirements

WEB SERVER	COMPATIBLE OPERATING SYSTEMS	
Microsoft IIS 7.0	Windows Server 2008	
	Windows SBS 2008	
	Windows EBS 2008	
Microsoft IIS 7.5	Windows Server 2008 R2	
	Windows SBS 2011 Standard or Essentials	
Microsoft IIS 8.0	Windows Server 2012	
Microsoft IIS 8.5	Windows Server 2012 R2	
Microsoft IIS 10	Windows Server 2016	

Hardware

TABLE 1-10. Minimum Requirements

REQUIREMENT	MINIMUM SPECIFICATIONS		
Processor	1GHz Intel Pentium x86 or compatible processor		
	1GHz x64 processor supporting AMD64 and Intel EM64T technologies		
Memory exclusively for the Messaging Security Agent	1GB		
Available disk space	2GB total		
	500MB for the Messaging Security Agent program files		
	1.5GB for Messaging Security Agent operations		

Mail Server

TABLE 1-11. Minimum Mail Server Requirements

MICROSOFT EXCHANGE VERSION	SERVICE PACK OR RELEASE	
2010	SP2 or above	
2013	SP1 with KB2938053	
2016	N/A	

Note

- The Messaging Security Agent does not support some Microsoft Exchange Server Enterprise features such as data availability group (DAG).
- For Exchange Server 2019, Trend Micro recommends getting **ScanMail™** for Microsoft Exchange.

See https://success.trendmicro.com/solution/1122677 for details.

Virtualization

Agents support the same virtualization applications supported by the Security Server. See *Virtualization on page 1-5*.

Trend Micro Security (for Mac) Client Requirements

Visit the following website for the complete list of requirements:

http://docs.trendmicro.com/en-us/enterprise/trend-micro-security-(for-mac).aspx

Chapter 2

Upgrade Requirements

Upgrading From Version 8.x

Security Server

The operating systems supported in Worry-Free Business Security 8.x are supported in this version with the following exceptions:

Worry-Free Business Security no longer supports Windows XP, Windows Vista, Windows 8, and Windows Server 2003.

Upgrade notes and reminders:

- 1. If the Security Server runs Windows Home Server, apply Power Pack 3.
- Check if the server computer needs additional resources to run this Worry-Free Business Security version. Refer to the following table for details:

RESOURCE	SECURITY SERVER 8.X REQUIREMENT	SECURITY SERVER 10.0 REQUIREMENT	
Disk space	6GB	11GB	

- 3. If Apache is currently used as web server:
 - Setup automatically upgrades the Apache version to 2.4 if the Apache web server was installed by the Worry-Free Business Security 8.x Setup program.
 - Setup keeps the existing Apache version if it was installed by other programs.
- 4. The scan method currently in use is retained after the upgrade.

Security Agent

The operating systems supported in Worry-Free Business Security 8.x are supported in this version with the following exceptions:

The Security Agent no longer supports Windows XP/Vista/7/8/8.1 and Windows Server 2003/2008/2008 R2.

If the Security Agent runs on an unsupported operating system, the Security Agent can only perform pattern updates after the Security Server upgrades to

the new version. All other component updates are blocked, leaving the component status in version 8.x.

Messaging Security Agent

Worry-Free Business Security supports upgrades from previous versions of Messaging Security Agents. See the *Installation and Upgrade Guide* for more information.

Upgrading From Version 9.x

Security Server

The operating systems supported in Worry-Free Business Security 9.x are supported in this version with the following exceptions:

Worry-Free Business Security no longer supports Windows XP, Windows Vista, Windows 8, and Windows Server 2003.

Upgrade notes and reminders:

- 1. If the Security Server runs Windows Home Server, apply Power Pack 3.
- 2. Check if the server computer needs additional resources to run this Worry-Free Business Security version. Refer to the following table for details:

RESOURCE	SECURITY SERVER 9.0 REQUIREMENT	SECURITY SERVER 10.0 REQUIREMENT	
Disk space	6GB	11GB	

- 3. If Apache is currently used as web server:
 - Setup automatically upgrades the Apache version to 2.4 if the Apache web server was installed by the Worry-Free Business Security 9.x Setup program.
 - Setup keeps the existing Apache version if it was installed by other programs.
- 4. The scan method currently in use is retained after the upgrade.

Security Agent

The operating systems supported in Worry-Free Business Security 9.x are supported in this version with the following exceptions:

The Security Agent no longer supports Windows XP/Vista/7/8/8.1 and Windows Server 2003/2008/2008 R2.

If the Security Agent runs on an unsupported operating system, the Security Agent can only perform pattern updates after the Security Server upgrades to the new version. All other component updates are blocked, leaving the component status in version 9.x.

Messaging Security Agent

Worry-Free Business Security supports upgrades from previous versions of Messaging Security Agents. See the *Installation and Upgrade Guide* for more information.

Upgrading From Version 10.0

Security Server

The operating systems supported in Worry-Free Business Security 9.x are supported in this version with the following exceptions:

Worry-Free Business Security no longer supports Windows XP, Windows Vista, Windows 8, and Windows Server 2003.

Upgrade notes and reminders:

- 1. If the Security Server runs Windows Home Server, apply Power Pack 3.
- 2. Check if the server computer needs additional resources to run this Worry-Free Business Security version. Refer to the following table for details:

RESOURCE	SECURITY SERVER 9.0 REQUIREMENT	SECURITY SERVER 10.0 REQUIREMENT	
Disk space	6GB	11GB	

- 3. If Apache is currently used as web server:
 - Setup automatically upgrades the Apache version to 2.4 if the Apache web server was installed by the Worry-Free Business Security 10.0 Setup program.
 - Setup keeps the existing Apache version if it was installed by other programs.
- 4. The scan method currently in use is retained after the upgrade.

Security Agent

The operating systems supported in Worry-Free Business Security 10.0 are supported in this version with the following exceptions:

The Security Agent no longer supports Windows XP/Vista/7/8/8.1 and Windows Server 2003/2008/2008 R2.

If the Security Agent runs on an unsupported operating system, the Security Agent can only perform pattern updates after the Security Server upgrades to the new version. All other component updates are blocked, leaving the component status in version 10.0.

Messaging Security Agent

Worry-Free Business Security supports upgrades from previous versions of Messaging Security Agents. See the *Installation and Upgrade Guide* for more information.
