Trend Micro™ TippingPoint™ Security Management System Release Notes

Version 5.5.4.1

This release includes all issues fixed in the *Security Management System Release Notes Version 5.5.4*. For details about those changes, refer to the respective Release Notes on the [Online Help Center](#).

Important notes for SMS

- All v5.5.4 customers can optionally apply this patch so that the issues it addresses are corrected. However, upgrades to a later TOS do not require an installation of this patch first.

- Patch installation should take approximately 15 minutes.

- To prevent your account from being disabled while you wait for authentication resources to become available after the reboot, navigate to **Edit > Preferences** and make sure that you deselect **Lock user after failed login attempts** and **Auto reconnect client to server after a disconnect occurs**. The SMS automatically reboots after you install this release. You will then be prompted to update the SMS client.

- This patch can be uninstalled or rolled back to the previous version.

Release contents

The following enhancements or repairs are included in this release.

Description	Reference
A performance issue with SMS and Trend Vision One™ integration that caused SMS event reporting delays has been repaired.	SEG-165162 TIP-87911
Performance issues affecting SMS profile distributions have been repaired.	SEG-164976 TIP-88125 SEG-166650 TIP-88310
When it does not have direct internet access, the SMS now displays a yellow warning symbol instead of a red critical symbol for `Undetermined Revocation Status`. This properly reflects the lower severity when OCSP/CRL URI cannot be reached.	SEG-155765 TIP-86234
The SMS now indicates when a CA certificate is expired: • In the **Certificate Details > Path** panel • After a certificate's tooltip `Expires On` date in the CA Certificates table	TIP-85164
This release fixes an issue that caused profile distributions to fail because of special characters used in the SSL profile description.	TIP-80858
Under high CPU usage conditions, the SMS client no longer hangs when trying to access the vSMS.	SEG-165834 TIP-88696
The SMS interface no longer hangs after running a saved report.	SEG-169383 TIP-89250
An email alert is now sent after a scheduled or automatic Auxiliary DV download/activation/distribution.	SEG-90493 TIP-41314 SEG-136653 TIP-85340
The SMS database cleanup processes now work correctly on row-based partitioned tables.	TIP-89402
You can now select multiple users across multiple TPS devices and specify a new password across all those TPS devices at the same time. Navigate to **Devices > All Devices > Member Summary > Device Users**, select the users whose passwords you want changed, and click **Edit**.	TIP-69514
